

YASH PATEL

DeLand, FL, 32723 (*Open to relocation*)

386-986-8201 | ypatel2@stetson.edu | yashbpatel.vercel.app | github.com/YashPatel04 | linkedin.com/in/yashpatel2004

EDUCATION

Stetson University, DeLand, FL

Expected Graduation: Dec 2026

Bachelor of Science, Computer Science (*Dean's List Student*)

GPA: 3.75

Relevant Coursework: Calculus I, II & III, Software Development I & II, Computer Networks, Object-Oriented Design, Web Development, Database Systems, Algorithm Development, Data Science & Analytics, Operating Systems

TECHNICAL SKILLS

Programming Languages: Python, Java, C, C++, JavaScript, TypeScript, HTML, PHP, CSS, TailwindCSS

Frameworks & Libs: React, React Native, Redux, Next.js, Node.js, Express, Django, OpenCV, LangChain, SciKit

Cloud & DevOps: AWS (EC2, S3, RDS), GCP, Docker, Kubernetes, SQL, NoSQL (MongoDB), Linux, NGINX, Apache, Firebase

Tools & Practices: NPM, PM2, Git, REST APIs, SDLC, Agile, Postman, Unit Testing, CI/CD, RAG, Ollama, n8n

EXPERIENCE

Stetson University

August 2025 – Present

Software Engineer Intern (*Capstone*)

DeLand, FL

- Collaborated with a **8-member** cross-disciplinary team to design and deploy a **cloud-native, microservices-based virtualized campus** using AWS EC2 and Docker, simulating **50+ concurrent cyberattack scenarios** to test network resilience.
- Deployed Suricata IDS/IPS with **45K+ active detection rules** and integrated Cowrie **honeypots** across distributed systems, improving **operational reliability** and enabling automated correlation of intrusion events.
- Fine-tuned **GenAI-powered RAG agents** with feedback loops and modular retrieval, **cutting false positives by 40%** and enhancing reliability in AI-driven incident detection.

SignStream - Digital Signage Solution

Dec 2024 – Present

Founder & Developer

signstreamus.com

- Took end-to-end ownership of a **cloud-native SaaS platform** serving **5+ retail clients**, enabling real-time, **scalable** content delivery and achieving **99%** uptime.
- Engineered secure and fault-tolerant media streaming with Socket.io and edge caching on Raspberry Pi, deploying backend services on AWS EC2 with firewall rules, SSL encryption, and rate-limited APIs, serving **500 + daily ad impressions**.
- Automated subscription billing with Stripe webhooks, cutting **100%** of manual invoicing overhead.

AASOA - Store Owners Association

May 2024 – July 2024

Full Stack Intern

Remote(India)

- Developed and maintained the company's **WordPress portal**, building custom **PHP-based webpages and forms** that processed over **\$50K in transactions** and **2,000+ user registrations**.
- Designed and implemented an intuitive WordPress dashboard for non-technical staff to post updates and manage content, reducing manual content management time by **80%**.

PROJECTS

AI Email Classifier | *n8n, Google Gemini, Gmail API* | [GitHub Repo](#)

October 2025

- Built an **AI-driven workflow** automation system using n8n, Gmail API, and Google Gemini 2.0 to classify and label **100+ daily** emails with **90%** accuracy, leveraging cloud-based **NLP** integration.

CliquePay - Budget Tracking | *Django, React, AWS, MySQL* | [GitHub Repo](#)

Jan 2025 – May 2025

- Led a team of **3 developers** to build and deploy a **React + Django** full-stack finance app for group expense tracking; implemented scalable **REST APIs** and integrated AWS Cognito for authentication.
- Optimized SQL queries using Django ORM and reduced database latency by **40%**, while developing **real-time group chats** using WebSockets for seamless collaboration.
- Deployed the application on AWS with **Docker** and coordinated Agile sprints to deliver production-ready features on schedule.

Pacman Game Clone | *C++, SFML, CMake* | [GitHub Repo](#)

Sep 2024 – Oct 2024

- Implemented a real-time, **object-oriented** game in C++ leveraging SFML featuring real-time event handling, collision detection, and optimized rendering loop to maintain **60 FPS**.
- Implemented **4 distinct ghost AI** states, including "Frightened Mode" to enhance gameplay complexity and dynamics.

Face Recognition System | *Java, OpenCV, Swing* | [GitHub Repo](#)

Feb 2024 – Mar 2024

- Engineered a **Java-based facial detection system** using OpenCV, implementing **multithreaded real-time video processing** and an interactive **Swing UI** integrating live camera feeds for robust detection and intuitive user interaction.

CERTIFICATIONS

Certifications: Foundations in Agentic-AI (*Stanford University – Prof. Andrew Ng, In-Progress*), Certificate in Python ([Link](#)), Certificate in C & C++ ([Link](#)), Data Structures and Algorithms using Java ([Link](#))
