

YASH PATEL

DeLand, FL, 32723

386-986-8201 | ypatel2@stetson.edu | yashbpatel.vercel.app | github.com/YashPatel04 | linkedin.com/in/yashpatel2004

EDUCATION

Stetson University, DeLand, FL

Expected Graduation: Dec 2026

Bachelor of Science, Computer Science (Dean's List Student)

GPA: 3.75

Relevant Coursework: Calculus II & III, Software Development I & II, Physics, Computer Networks, Web App Development, Database Systems, Algorithms, Big Data Mining, GenAI & Analytics for Anomaly Detection.

PROFESSIONAL EXPERIENCE

SignStream - Digital Signage (Dec 2024 – Present) [Website](#)

React, Node.js, Express, Socket.io, MySQL, AWS

- Individually Designed and deployed a digital signage **SaaS** platform for convenience stores from scratch, enabling remote content scheduling and display of dynamic offers in **5+ stores**.
- Utilized Socket.io for real-time content updates and MySQL for persistent storage. Implemented secure screen pairing, role-based access control, and offline content caching on optimized Raspberry-pi (Lubuntu) for the clients.
- Integrated **Stripe APIs** to automate subscriptions and invoices, streamlining client payments with tax collection and eliminating manual billing.
- Deployed backend services securely on a Linux-based EC2 instance, using firewall rules, rate limits, SSL encryption, and best security practices, supporting **500+ ad impressions** daily.

CliquePay - Expense tracking (Jan 2025 – May 2025) [GitHub Repo](#)

Python(Django), React, MySQL, AWS

- Collaborated in a 3-member **team** to design and develop a full-stack finance management web app tailored for groups.
- Built and optimized Django ORM models to manage users, expenses, transactions, and group associations, enabling scalable and secure database interactions, cutting database query time by **30%**.
- Engineered backend logic using Django REST Framework and integrated robust authentication via AWS Cognito.
- Built real-time personal and group chat functionality , containerized the app with Docker, and deployed it on AWS EC2.

PROJECTS

Portfolio Website (Aug 2024 – Sep 2024) [GitHub Repo](#)

React, Node.js, GSAP

- Designed and developed a portfolio website from scratch using React.js for the frontend and Node.js for backend.
- Constructed a fully responsive personal website with React and GSAP, emphasized smooth scrolling.
- Achieved **85%** Lighthouse performance score through optimization techniques.
- Implemented contact functionality using Gmail API and nodemailer, generating **10+** interactions within the first month.

Pacman Game Clone (Sep 2024 – Oct 2024) [GitHub Repo](#)

C++, SFML, CMake

- Developed Pacman clone leveraging **C++** and the SFML library featuring ghost AI, real-time event handling, and collision detection.
- Integrated a 'Frightened Mode' AI by refining ghost decision-making matrices; increased game difficulty and playtime.
- Achieved cross-platform compatibility using CMake, reducing build time by 50%.

Face Recognition System (Feb 2024 – Mar 2024) [GitHub Repo](#)

Java, OpenCV

- Developed a Java-based facial detection system and utilized OpenCV computer vision library with real-time video processing and multithreaded architecture.
- Implemented a responsive user interface with Swing components enabling seamless camera integration, face detection functionality, and intuitive user controls.

SKILLS

Programming Languages: Python, Java, C, C++, JavaScript, TypeScript, HTML5, CSS, TailwindCSS

Technologies & Frameworks: ReactJS, Redux, NextJS, NodeJS, ExpressJS, Django, AWS (EC2, S3, Cognito, RDS)

Libraries & Tools: OpenCV, GSAP, NumPy, Matplotlib, Pillow, Tkinter, SFML, Git & GitHub

Developer Tools & Platforms: Shell, VSCode, Docker, MySQL, MongoDB, Linux, Vercel, Maven, Gradle, CMake, REST API, SDLC, Agile, GCP, NGINX, Apache, PM2, Ubuntu server, Azure, Firebase, Postman

CERTIFICATIONS

- Certified in C & C++
- Certified in Python
- Certified in Data Structures and Algorithms using Java
